

Ignis Elite NFT: Terms and Conditions

Effective Date: 2026-07-10

Version: 1.1

Last Updated: 2026-07-10

By acquiring and holding the Ignis Elite NFT, you acknowledge and agree to these terms and conditions:

Community Access and Benefits

- ▲ **Curated Community Access:** The Ignis Elite NFT grants membership to our exclusive, carefully curated community of forward-thinking individuals committed to building a decentralized future.
- ▲ **Comprehensive Product Access:** NFT holders receive access to the complete suite of Ignis AI Labs products and services, including all current and future trading tools, analytics platforms, and community resources.
- ▲ **Priority Access:** Ignis Elite members enjoy priority access to new product releases, features, and services before they become available to the general public.
- ▲ **Development Input:** Members have the opportunity to provide direct feedback that shapes our product roadmap and technological development.
- ▲ **Community Rewards Program:** Qualified NFT holders may participate in our community rewards program as detailed in our protocol documentation.

Membership and Community Standards

- ▲ **Curated Membership:** Ignis Elite is a selectively curated community. We maintain high standards for community participation and alignment with our vision of building a more decentralized ecosystem.
- ▲ **Community Alignment:** Members are expected to contribute positively to our collective mission and uphold the values of our community as outlined in our Code of Conduct.
- ▲ **Membership Review:** Ignis AI Labs reserves the right to periodically review community membership to ensure continued alignment with our vision and values.
- ▲ **Right to Refuse Service:** Ownership of an Ignis Elite NFT grants a license and eligibility for access — not an unconditional right to be served. Ignis AI Labs reserves the right to refuse, restrict, or revoke access to any community surface, platform component, or service, in whole or in part, where a holder's conduct harms the community or the ecosystem. This includes, without limitation, attempts to manipulate the value of the ecosystem, schemes to extract value at the community's expense, and conduct that compromises the well-being of other members. Consequences apply to the surfaces and services Ignis controls; on-chain assets remain in the holder's custody.

- ▲ **Proportionate Security:** We protect the community without surveilling it. Ignis AI Labs applies the verification and security measures required to know who it is dealing with — and no more. Protection of the ecosystem is always balanced against the sovereignty and privacy of every member.
- ▲ **Respectful Separation Process:** In cases where Ignis AI Labs determines that a member no longer aligns with our community vision, or where a member chooses to leave, Ignis will conduct a respectful separation process — revoking access to Elite community surfaces and Elite-gated features. The Ignis Elite NFT remains on-chain in the member's custody, and the member retains any right the NFT itself carries independent of community-surface access. Where Ignis considers it in the community's interest and has the resources to do so, Ignis may offer to repurchase the NFT as part of the separation. Any such repurchase is made at Ignis AI Labs' sole discretion, on terms set at the time of the offer. It is not an obligation, an entitlement, or a price guarantee, and no member should rely on it when valuing their position.

Community Mutual Confidentiality and Non-Disclosure

Mutual Protection Framework

- ▲ **Community Mutual NDA:** By holding the Ignis Elite NFT, you automatically enter into a mutual non-disclosure agreement with Ignis AI Labs and all other NFT holders, creating a protected environment for innovation and collaboration.
- ▲ **Bidirectional Confidentiality:** This agreement works both ways:
 - ▲ Ignis AI Labs protects the confidential information that community members share about their projects, strategies, and developments
 - ▲ Community members protect Ignis AI Labs' proprietary information and the confidential information shared by other community members

Protected Information

- ▲ **Ignis Confidential Information:** All communications, discussions, and information shared within Ignis AI Labs' private channels, groups, or communities, including:
 - ▲ Trading strategies, algorithms, and technical specifications
 - ▲ Business plans, roadmaps, and strategic initiatives
 - ▲ Unreleased features, products, or services
 - ▲ Financial data, user metrics, and performance information
- ▲ **Community Member Confidential Information:** Information shared by NFT holders about their own projects and developments, including:
 - ▲ Project concepts, business ideas, and development plans
 - ▲ Technical implementations and proprietary methodologies
 - ▲ Trading strategies and investment approaches
 - ▲ Partnerships, collaborations, and strategic relationships
 - ▲ Any information explicitly marked or reasonably understood to be confidential

Mutual Obligations

- ▲ **Respect for All Confidential Information:** You agree to:

- ▲ Keep all confidential information (both from Ignis and other community members) strictly confidential
 - ▲ Not disclose any confidential information to third parties without written consent
 - ▲ Use confidential information solely for collaboration within the Ignis ecosystem
 - ▲ Take reasonable precautions to prevent unauthorized disclosure
- ▲ **Community Trust Standard:** The Ignis community operates on mutual trust and respect, where members can freely share ideas and collaborate knowing their innovations are protected.

Collaborative Innovation

- ▲ **Safe Sharing Environment:** This mutual NDA creates a secure space where:
- ▲ Members can discuss projects openly without fear of idea theft
 - ▲ Collaborative opportunities can be explored with confidence
 - ▲ The community can provide feedback and support while respecting ownership
- ▲ **Collaborative Over Competitive:** While members may operate in similar spaces, the community prioritizes collaboration and mutual support over competition.

Exceptions and Fair Use

- ▲ **Excluded Information:** The mutual NDA does not cover:
- ▲ Information that becomes publicly available through proper channels
 - ▲ General industry knowledge and standard practices
 - ▲ Information independently developed without use of confidential information
 - ▲ Information required to be disclosed by law (with appropriate notice)
- ▲ **Duration:** Confidentiality obligations continue for three (3) years after information disclosure, except for trade secrets which remain protected indefinitely.

Intellectual Property Rights and Collaborative Framework

Individual IP Protection

- ▲ **Your IP Remains Yours:** Each community member retains full ownership of:
- ▲ Pre-existing intellectual property, technologies, and methodologies
 - ▲ Independently developed innovations and solutions
 - ▲ Business concepts and strategies you bring to the community
 - ▲ Any IP you develop outside of collaborative efforts
- ▲ **Clear Boundaries:** The mutual NDA protects but does not transfer ownership of:
- ▲ Your unique trade techniques and methodologies
 - ▲ Proprietary prompt engineering methods and frameworks
 - ▲ Source code, algorithms, and technical implementations
 - ▲ Business strategies and competitive methods

Collaborative IP Framework

▲ **Joint Creation Recognition:** When community members collaborate:

- ▲ Jointly developed IP is recognized as “Shared IP”
- ▲ Both/all contributors have rights to the shared innovation
- ▲ Commercial use requires mutual consent from all contributors
- ▲ Good faith negotiations determine usage rights

▲ **Collaboration Benefits:** The framework encourages:

- ▲ Open innovation without fear of IP theft
- ▲ Clear attribution and recognition of contributions
- ▲ Fair sharing of benefits from joint developments
- ▲ Transparent collaboration agreements

Freedom to Operate and Build

▲ **Complete Business Freedom:** Nothing in this agreement restricts you from:

- ▲ Forming new business relationships or partnerships
- ▲ Working with clients using your own IP and knowledge
- ▲ Operating in any market or industry
- ▲ Developing competitive products using your own technology

▲ **Collaborative Over Competitive Spirit:** While maintaining freedom:

- ▲ Collaboration with community members is encouraged when beneficial
- ▲ Mutual assistance creates more value than competition
- ▲ Good faith communication about potential overlaps
- ▲ Respect for the community relationship while preserving independence

Our Commitment to Collaborative Trust

Building a Thriving Innovation Space

▲ **Trust as Foundation:** This mutual NDA framework exists to:

- ▲ Foster genuine collaboration and mutual empowerment
- ▲ Create a space where ideas can thrive without fear
- ▲ Enable members to find win-win situations in every interaction
- ▲ Build deep trust between Ignis and all community members

▲ **Safe Exploration Environment:** We commit to:

- ▲ Protecting your innovations as fiercely as we protect our own
- ▲ Actively seeking opportunities to connect and empower members
- ▲ Building with you, not just for you

- ▲ Creating an ecosystem where breakthrough ideas emerge from trust

Enforcement and Accountability

- ▲ **Protection for All:** Violations of the mutual NDA harm our entire community and will be addressed seriously:
 - ▲ **Legal Recourse:** Both Ignis and affected community members may pursue legal action for serious breaches
 - ▲ **Community Standards:** Clear infractions result in immediate consequences
 - ▲ **Zero Tolerance:** Willful violations of confidentiality or IP theft are not tolerated
- ▲ **Enforcement Actions:**
 - ▲ **Minor Violations:** Warning and opportunity to remedy
 - ▲ **Clear Infractions:** Immediate revocation of access to Ignis community surfaces and Elite-gated features
 - ▲ **On-Chain Custody:** Expulsion does not automatically involve a repurchase of the Ignis Elite NFT; it remains in the member's on-chain custody, and access consequences apply to the surfaces and services Ignis controls. Ignis may, at its sole discretion and resources permitting, offer to repurchase the NFT as part of a separation
 - ▲ **Legal Action:** Pursuit of damages and injunctive relief for serious breaches
 - ▲ **Public Disclosure:** Right to notify community of serious violations (while respecting privacy laws)

Living Our Values

- ▲ **Ignis Standards:** We hold ourselves to these same standards by:
 - ▲ Respecting and protecting every member's confidential information
 - ▲ Actively facilitating collaborative opportunities
 - ▲ Transparently communicating about potential conflicts
 - ▲ Prioritizing community success alongside our own growth
- ▲ **Community Culture:** Together we create:
 - ▲ A high-trust environment where innovation flourishes
 - ▲ Genuine partnerships based on mutual respect
 - ▲ Shared success through collaborative problem-solving
 - ▲ A legacy of empowerment and collective achievement

Ownership and Transfer

- ▲ **Blockchain Verification:** The Ignis Elite NFT's authenticity and ownership are securely recorded on the blockchain.
- ▲ **Ownership Transfer:** All rights associated with the Ignis Elite NFT, including tool access, community membership, and any applicable rewards, transfer to the new owner upon sale.
- ▲ **Usage Limitations:** This NFT is solely for accessing Ignis AI Labs' ecosystem. Unauthorized use or transfer outside this scope is prohibited.
- ▲ **Intellectual Property Rights:** The NFT grants access to our products and community but not ownership of the underlying software or technology. We retain all intellectual property rights related to our digital assets, products, and the NFT itself.

Risk and Responsibility

- ▲ **Trading Warning:** Using our tools for trading in forex and crypto markets involves risks, including potential significant financial losses. We do not guarantee profits; conduct thorough research and consider your risk tolerance.
- ▲ **Legal Compliance:** You must comply with all laws and regulations regarding NFT ownership, cryptocurrency trading, and use of our services in your jurisdiction.
- ▲ **Data Privacy and Security:** Your personal and financial data are protected in accordance with our Privacy Policy and relevant data protection laws.
- ▲ **Tax Implications:** Consult a tax professional regarding NFT transaction tax treatment. We don't provide tax advice.

Administrative

- ▲ **Contact and Support:** For inquiries or support, contact us at elijah@ignislabs.ai.
- ▲ **Terms Updates and Modifications:**
 - ▲ We reserve the right to modify these terms and conditions at any time as needed to address new circumstances, regulatory changes, or community needs.
 - ▲ While we commit to making only reasonable and necessary updates, by holding the Ignis Elite NFT, you agree to be bound by the current version of these terms, including any future modifications.
 - ▲ We will provide notice of significant changes to these terms through our community channels.
 - ▲ Continued holding of the Ignis Elite NFT after terms have been updated constitutes acceptance of the modified terms.
 - ▲ We will maintain an archive of previous versions of these terms for reference.
- ▲ **Acknowledgment of Understanding:** By acquiring and continuing to hold the Ignis Elite NFT, you acknowledge and agree to these terms, including any future reasonable modifications.
- ▲ **Effective Date:** These terms are effective upon the purchase of the Ignis Elite NFT or upon the latest revision date, whichever is more recent.

Ignite your potential, build the decentralized future with Ignis AI Labs
